

ARCHITECTURAL ZINC

Superior performance for superior design

Flatlock Tiles from Jarden Zinc

The system features aesthetically pleasing designs in various patterns and configurations.

Flatlock Tiles are a beautiful, durable, long-lasting alternative for building façades. A façade created with zinc Flatlock tiles can last generations, even in adverse climates.

Interlocking Design

The top of each Flatlock tile is extended and folded over. This design inhibits moisture from driving behind the system. The bottom is also folded over to give the tile a smooth, finished look. All four sides of each tile interlock with corresponding tiles. Each starter tile is precut and bent to lock into the drip edge flashing, which saves installation time.
